

Louvred Weepa Specifications

Applications

Perpend to external leaves of cavity walls in the course directly above damp proof courses, flashing and cavity fill, and at the bottom of infill cavity. Spacing: Not to exceed 1200mm.

Note: Designs for damper climates and air-conditioned buildings should consider closer spacing for greater airflow in order to dry cavities.

Sample Specifications

Provide weep holes to AS3700 clause 4.7.2, in the form of Louvred Weepas (Product Code 16-LOUW), to external leaves of cavity walls in the course directly above damp proof courses, flashing and cavity fill, and at the bottom of the infill cavity. Spacing: Not to exceed 800mm.

Note: Designs for extreme climates and air-conditioned buildings should consider closer spacing than AS3700 for greater airflow to dry cavities.

Technical Information

Feature	Data
Size	75 mm (H) x 10 mm (W) x 105 mm (D)
Body	Polypropylene (PP)
Louvred Vermin Guard	Polyvinylchloride (PVC)
Product Code	16-LOUW
