## Technical Datasheet

# Protector Weep Hole Screen (21-ssws)

### Description

A weep hole insert suitable for retrofitting into weep holes between 7 mm and 17 mm in width. Suitable for standard brick heights of 75 mm with allowance for mortar. Does not compromise cavity ventilation and protects against the entry of vermin and sparks and embers from bushfires.

### Applications

Use only on existing buildings. If constructing a new building use Weepa Weep Hole Formers suitable for your construction method and bushfire compliance requirements.

### Technical Information

Size	87 mm (H) x 20 mm (W) Punched ventilation holes of 1.6 mm diameter.
Body	316 Stainless Steel
Bushfire Compliance	AS3959:2018 BAL-LOW, BAL-A12.5, BAL-A19, BAL-A29, BAL-A40, BAL-FZ when used in masonry construction
Product Code	21-SSWS
