

TECHNICAL DATASHEET

Protector Weep Hole Screen (21-SSWS)

Product Code: 21-SSWS

Description:

A weep hole insert suitable for retrofitting into weep holes between 7mm and 17mm in width. Suitable for standard brick heights of 75mm with allowance for mortar. Does not compromise cavity ventilation and protects against the entry of vermin and sparks and embers from bushfires.

Applications:

Only use this product on existing buildings with existing weep holes. If constructing a new building, use the Weepa product suitable for your construction method and bushfire compliance requirements. [Click here](#) for more details.

Installation:

To be installed into existing weep holes using the provided applicator tool and sits totally within the weep hole without detracting from your face brick or rendered finish. Works with the [Termite Protector Weep Hole Screen](#) for ultimate weep hole protection.

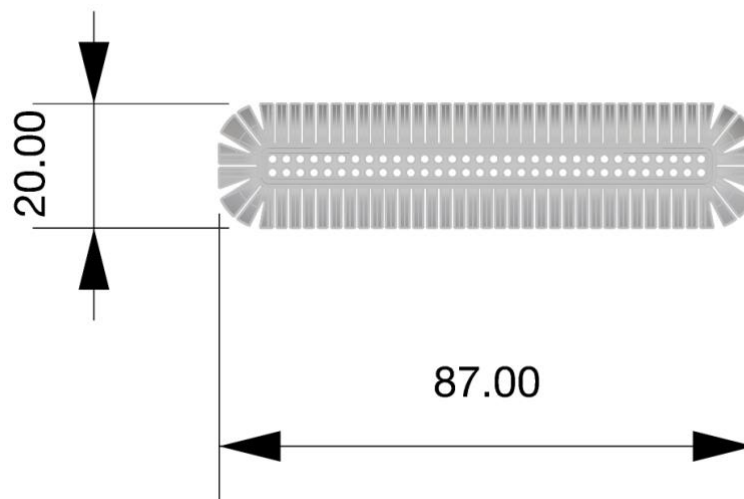

Bushfire Attack Level (BAL) rating:

Certified for construction in bushfire prone areas as defined in AS3959:2018 when used in masonry construction to BAL levels:

BAL-LOW	BAL-A12.5	BAL-A19	BAL-A29	BAL-A40	BAL-FZ
