

Weepa protects your home and family

Cavity brick walls must have weep holes for drainage and ventilation, but they often look ugly, let vermin in and present a bushfire hazard.

Weepa products provide solutions.

weepa

Perfect weepholes every time!

Bushfire protection with **Weepa**

Bushfires destroy more houses through wind-borne sparks and ember attack than through radiant heat or direct flame. Weepa's stainless steel mesh prevents embers being drawn in through weep holes and igniting combustible materials in walls and ceilings.

Check out weepa.com.au for products to help you comply with the Bushfire Attack Levels of AS3959:2018.

About us

Weepa Products Pty Ltd is a family-owned Australian business. We have been designing and manufacturing weep hole products since 1994. All of our products are tested in accredited laboratories to meet all relevant Australian Standards.

For more details on the entire Weepa range, including BAL compliance, visit **weepa.com.au** or phone (07) 3844 3744
